We see a kind of milk in tins. It is powdered milk. All the water in this milk is evaporated. When fresh milk stays in a dish for a little time, the thick part of the milk comes to the top. It is the cream of the milk. From this cream people make butter. If milk with the cream on it is made into powder, it is called 'Full Cream Milk Powder'. When something floating is taken off from the top of a liquid, we say, it is skimmed. When the cream is skimmed from the milk, the thin milk that stays is called 'Skim Milk'. Skim milk is good milk but it has no fat in it. It is not good for very young babies.
